Anne Ross Library Home Page

The screenshot displays the Anne Ross Library Home Page. At the top, a large banner image shows a coastal landscape with mountains and the ocean, with the text "Anne Ross Library" overlaid. Below the banner is a navigation bar with links: ABOUT, LIBRARY, CONTACT, ARCHIVE, and UMHS HOME.

The main content area is divided into three columns:

- RESOURCES**: A list of links including Library Catalogue, UMHS LMS, LMS Library Services, Discovery Search, Academic Search, Medline Complete, Clinical Academic eBooks, PubMed +UMHS Link, Google Scholar +UMHS Link, Access Medicine, JAMAevidence, and UpToDate.
- Welcome**: A central section featuring the EBSCO Discovery Search interface. It includes a search bar, a "Search" button, and options to limit results by Keyword, Title, or Author. Below the search bar, there are checkboxes for "Full Text", "Peer Reviewed", and "Catalog Only". A paragraph describes the library's mission to support the curriculum, research, and information needs of students and faculty through various resources.
- NEWS & EVENTS**: A section with three news items:
 - March 2021**: Continue to enjoy full access to the excellent AMBOSS Library & QBank! For further instructions see LMS Library Services.
 - February 2021**: UMHS now enjoys full access to the excellent AMBOSS Library & QBank! For further instructions see LMS Library Services.
 - November 2021**: Discover the EBSCO eBook Mobile App, the quickest and easiest way to read EBSCO eBooks!
 - October 2021**: The go-to clinical point-of-care resource UpToDate is now available to UMHS Faculty & students.

WHO Embarks on the Creation of a Global Health Facilities Database

The World Health Organization is responding to a crucial global health care need. The need to simply know *'Where are your health facilities?'*

The WHO announced the creation of a new **Global Health Facilities Database (GHFD)** that will allow all populations to locate and access information about health care services and facilities on a global scale. This timely and essential repository will

'standardize the master lists of local and regional health facilities into an open database. Doing so will strengthen country's technical capacity at all levels, improve data interoperability across information systems, support the provision of universal health coverage...' etc.

 A Global Health Facility Database as a Global G...

...facilitating communication between the Library and the Faculty, students, staff and community partners of the University of Medicine & Health Sciences (UMHS).

UpToDate Search

The screenshot displays the UpToDate web interface. At the top, there is a search bar with the text 'Search UpToDate' and a magnifying glass icon. To the right of the search bar, the 'University of Medicine and Health Sciences' logo is visible. Below the search bar, a navigation menu includes 'Contents', 'Calculators', 'Drug Interactions', and 'UpToDate Pathways'. On the far right of this menu are 'Register' and 'Log In' buttons. A 'Back' button is located on the left side of the main content area. The main content area is titled 'COVID-19: Management in hospitalized adults'. Below the title, it lists the authors (Arthur Y Kim, MD, FIDSA; Rajesh T Gandhi, MD, FIDSA), the section editor (Martin S Hirsch, MD), and the deputy editor (Allyson Bloom, MD). A link for 'Contributor Disclosures' is also provided. A note states: 'All topics are updated as new evidence becomes available and our peer review process is complete. Literature review current through: Dec 2021. | This topic last updated: Jan 24, 2022.' The 'INTRODUCTION' section follows, discussing the importance of coronaviruses and the specific management of COVID-19 in hospitalized adults. It mentions that the topic will discuss management in hospitalized adults, noting that the approach evolves rapidly as clinical data emerges. It also references local protocols and interim guidance from the World Health Organization and the National Institutes of Health. The 'EVALUATION' section is partially visible at the bottom. On the left side of the main content area, there is a 'Topic Outline' sidebar with a list of topics including 'SUMMARY AND RECOMMENDATIONS', 'INTRODUCTION', 'EVALUATION', 'GENERAL MANAGEMENT ISSUES', and 'COVID-19-SPECIFIC THERAPY'. A 'Topic Feedback' button is located on the right side of the main content area.

COVID-19: Management in hospitalized adults

Authors: [Arthur Y Kim, MD, FIDSA](#), [Rajesh T Gandhi, MD, FIDSA](#)
Section Editor: [Martin S Hirsch, MD](#)
Deputy Editor: [Allyson Bloom, MD](#)
[Contributor Disclosures](#)

All topics are updated as new evidence becomes available and our [peer review process](#) is complete.
 Literature review current through: **Dec 2021**. | This topic last updated: **Jan 24, 2022**.

INTRODUCTION

Coronaviruses are important human and animal pathogens. At the end of 2019, a novel coronavirus was identified as the cause of a cluster of pneumonia cases in Wuhan, a city in the Hubei Province of China. It rapidly spread, resulting in a global pandemic. The disease is designated COVID-19, which stands for coronavirus disease 2019 [1]. The virus that causes COVID-19 is designated severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2).

This topic will discuss the management of COVID-19 in hospitalized adults. Our approach to hospital management evolves rapidly as clinical data emerge. Clinicians should consult their own local protocols for management, which may differ from our approach. Interim guidance has been issued by the [World Health Organization](#) and, in the United States, by the [Centers for Disease Control and Prevention](#) [2,3] and the [National Institutes of Health](#) COVID-19 Treatment Guidelines Panel [4]. Links to these and other related society guidelines are found elsewhere. (See '[Society guideline links](#)' below.)

The management of patients with COVID-19 in the home and outpatient setting is discussed in detail elsewhere. (See "[COVID-19: Outpatient evaluation and management of acute illness in adults](#)".) (Related Pathway(s): [COVID-19: Initial telephone triage of adult outpatients](#) and [COVID-19: Anticoagulation in adults with COVID-19](#).)

Respiratory and critical care of patients with COVID-19 are also discussed separately. (See "[COVID-19: Respiratory care of the nonintubated hypoxemic adult \(supplemental oxygen, noninvasive ventilation, and intubation\)](#)" and "[COVID-19: Management of the intubated adult](#)".)

The epidemiology, clinical features, diagnosis, and prevention of COVID-19 are discussed in detail elsewhere. (See "[COVID-19: Epidemiology, virology, and prevention](#)" and "[COVID-19: Clinical features](#)" and "[COVID-19: Diagnosis](#)" and "[COVID-19: Infection prevention for persons with SARS-CoV-2 infection](#)" and "[COVID-19: Vaccines](#)".)

Abstract

Objective: This study aimed to explore the early functional results of total hip arthroplasty (THA) using the supercapsular percutaneously assisted total hip (SuperPATH) microposterior approach.

Methods: In this retrospective study, 58 patients treated with THA from October 2015 to April 2016 in our hospital were enrolled. A total of 28 patients (11 men and 17 women; mean age: 74.95±7.06 years) were operated on using the SuperPATH approach (group 1), and the remaining 30 patients (12 men and 18 women; mean age: 75.63±7.89 years) were operated on using the conventional posterior approach (group 2). To summarize the early functional results of the SuperPATH approach, we retrospectively analyzed the following demographics, perioperative factors, and measures of joint function: age, sex, preoperative diagnosis, preoperative visual analog scale (VAS) for pain, body mass

Below this, there are tabs for 'Bates' Physical Examination Videos', 'OSCE Clinical Skills Videos', and 'About'. The main content area is divided into two columns. The left column features a large image of a doctor examining a patient's chest, with the title 'Bates' Physical Examination Videos' and a list of chapters: 1. Head-to-Toe Assessment: Adult, 2. Head-to-Toe Assessment: Infant, 3. Head-to-Toe Assessment: Child, 4. Head-to-Toe Assessment: Older Adult, 5. General Survey and Vital Signs, 6. Skin, 7. Head, Eyes, and Ears, 8. Nose, Mouth, and Neck, 9. Thorax and Lungs, and 10. Cardiovascular. The right column contains a 'Create Free Personal Account' section, an 'OSCE Clinical Skills Videos' section, and a list of OSCE cases: OSCE 1: Chest Pain (14:55), OSCE 2: Abdominal Pain (12:42), and OSCE 3: Sore Throat (15:08). A footer note states: 'This site uses cookies. By continuing to use our website, you are agreeing to our [privacy policy](#). | [Accept](#)'.

Kaplan Review & Question Bank

*****You need to opt-in to gain access to this resource!**

- USMLE style Q-Bank
